

Vidicy

AI visa application review software for agencies

Taki Tajwaruzzaman Khan

Visa agencies still review applications by hand.

Forms. Passports. Bank statements. PDFs.

Small mistakes create delays, rework, and rejected applications.

Vidicy reviews visa applications in bulk.

Agencies upload client files.

Vidicy checks completeness, flags inconsistencies, and creates review reports.

**3 agencies committed to
\$10K/year each.**

Before the agency workflow was ready.

First wedge: bulk application review for visa and travel agencies.

30 days of validation.

113 travelers interviewed across 12 countries.

15 visa/travel agencies interviewed.

20 travelers testing the first product.

The sharper pain is B2B workflow.

Travelers feel the stress.

Agencies feel the bottleneck every day.

Vidicy owns the review layer.

B2B SaaS for high-volume agencies.

\$10K/year starting price.

\$50K-\$100K/year for larger agencies with volume tiers, white-label, API, or usage pricing.

Path to \$100M ARR.

2,000 high-volume agencies globally at \$50K/year.

Then expand from travel visas into immigration workflows.

Technical repeat founder with domain insight.

Built ShareTrip's visa processing pipeline.

Grew Klyne Labs to ~\$600K revenue.

Wrote Vidicy myself.

Invest in Vidicy.

To turn manual visa review into AI infrastructure for agencies.
